## POLYETHYLENE DOORS AND CLOSINGS FOR FOOD USE

The Italian Company O.C.M. has reached a particular experience in manufacturing industrial doors for food use.

We can propose you polyethylene doors, flexible doors, high-speed doors, strip curtains.

### POLYETHYLENE DOOR FOR FOOD USE

Our polyethylene doors are the proper solution for environments where hygiene is essential.

They guarantee an excellent barrier against bacteria and cross-contamination.

They are corrosion resistant and washable.

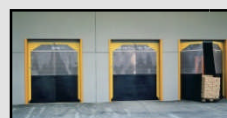

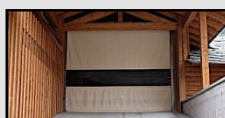

They are usually installed in meat packing and slaughtering plants, food-processing plants, supermarkets.

Their framework, made of stainless steel, offer a durable everyday use. They are custom built according to your individual needs.

Their opening is very simple in both directions, thanks to a torsion spring device.
